

457 Drive-Thru Headset

Bringing Clarity to Wireless Drive-Thru Solutions

THE NEXT GENERATION IN INDUSTRY LEADING DIGITAL NOISE CANCELLATION SYSTEM

All-in-One 457 Headset is exclusively designed for the Panasonic Attune Wireless Communication System. It completes the drive-thru solutions and enables line busting with ease.

Equipped with a microphone, earphone, battery compartment, and control buttons, the 457 Headset includes built-in antennas, transmitter, and receiver allowing staff to communicate with other store personnel and customers.

Benefits & Key Features

UNINTERRUPTED COMMUNICATIONS

Operating on the restrictive DECT 6.0 – 1.9GHz band, Attune II avoids noises coming from WiFi, restaurant equipment, and phone frequencies, leaving you with maximum clarity.

TRUSTED DURABILITY

The 457 Headset has been built to withstand your harsh environments with advanced exchangeable filters installed where it matters.

VOICE CLARITY

Utilizing 4 levels of DNR and Echo Cancellation, the 457 Headset enables the crew members to hear the customers order correct the first time.

PANASONIC BATTERY

Panasonic built with long-lasting reliability and enhanced recharge capability that covers a busy shift without disruptions.

SERVICE & SUPPORT

Flexible services and support programs designed to maximize up time and reduce variable costs.

SIMPLE AND EASY TO USE

Built to work seamlessly with your drive-thru operation with just four buttons to talk, change volume, page, or change lanes...communication is simple and easy.

ADVANCED FEATURES COME STANDARD

- Uses a 1.9 GHz band DECT* frequency to not experience any interference from microwave ovens or wireless LANs
- Supports up to 32 headsets per Center Module. A single headset can be connected to 32 Center Modules, known as the Regional Manager Headset feature.
- Pairs with all Attune I and Attune II Center Modules and works seamlessly with your current headsets. Saving you money on your current Drive Thru investment.
- Utilizes “Push to Talk”, “Talk Lock” and “Auto Talk Lock” modes for a seamless integration.
